2 Clamp and Holder Installation

The holder can be installed on the left, center, right or removed.

Note: if the holder does not slide smoothly, lay the shelf flat, loosen the holder rail screws on the shelf, re-seat the holder rails for smooth sliding, then screw the holder rails back down on the shelf.

3 Reverse Clamp and Holder Installation

Note: installing in reverse won't allow the back of the desk to sit flush against the wall but will provide more desk space in the front.
